

Use IT longer - Conserve resources

ISO-certification

ISO 27001, ISO 14001 and ISO 9001

We set standards

CC4 has set itself the task of making IT equipment usable for longer in order to help conserve resources and is therefore the specialist in the German-speaking world for highly professional remarketing of used IT equipment. We have set ourselves the goal of constantly raising the quality standards for IT remarketing throughout the industry and make it objectively verifiable.

ving the highest standards in the industry. Be it in the area of information security and data protection, the implementation of a consistent environmental policy or the quality and traceability of all processes.

ISO 27001 - information security

ISO 27001 is an international standard that supports companies in ensuring information security and data protection.

3-fold ISO-certified

For this reason, CC4 continuously undergoes triple ISO certification. In addition to the environmental standard ISO 14001 and the certification for quality management ISO 9001, CC4 is also certified for information security with ISO 27001.

ISO 14001 - environmental management

The international standard specifies requirements for an environmental management system with which an organization can improve its environmental performance, meet legal and other obligations and achieve environmental goals.

TÜV-certified - tested by a third party

Our TÜV certifications are confirmation from a third, independent party of the high standards we set for our customers. This means that our customers have the security of ha-

ISO 9001 - quality management

ISO 9001 standardizes international procedures and standards for binding quality management systems in companies and organizations.
